

Cincinnati Children's Utility Plant

This utility plant feels less like a machine delivering vital energy, heating, cooling and oxygen and more like a harmonious extension of the urban neighborhood in which it sits.

Project: Cincinnati Children's Hospital Critical Care Building Utility Plant, Cincinnati, OH

Use: Power Generation

Architects: GBBN Architects, OH
ZGF Architects, OR

Installer: Kalkreuth Roofing and Sheet Metal, KY

Products: 7,235ft MX-8, 4,140ft MX-1 Matrix® aluminum wall panels in Fluropon®

Design

Always interacting with its context, the walls of this urban utility plant push in and out, its roofline rising and descending as it tracks a bend in the road beside it. And as different sheens of the metal façade play with the changing light of the day, its interior lights shine through semi-reflective frosted windows like so many welcoming lanterns.

Façade Cladding

The architects specified profiles from Morin's popular Matrix Wall Series® architectural panels. Matrix provides an integrated concealed fastener rainscreen system in eleven profiles and 37 stock or any custom color. Morin's Fluropon® coating gives the plant's walls a pearlescent sheen and tones that shift color with the changing light of the day.
